Boise Fire Mapping – What Tool to Use When?

Use <u>Intterra</u> for <u>real-time situational awareness</u>, decision support, and adding features and preplans. Use a web browser to navigate to <u>https://portal.intterragroup.com/</u> for all devices. Account required.

INTTERRA TOOL TIPS

The First Due workspace has the fewest layers and will load the fastest.

Return to default map settings and layers by clicking the layers icon, gear icon, & clear button.

😫 🗘	?	
Layer Setting	s	
You have prefe	rred layers selected.	
Your preference settings.	es will return to default if	you clear your layer
	Clear	

Use the imagery basemap to view building footprints. Add footprint as a feature using the

Add Data pencil.

Use **<u>Boise Maps</u>** to <u>view BFD related GIS</u> <u>layers in one map</u>. No account is required.

Filter, query, buffer, and measure tools are available. It can be accessed via Boise Home – the Commons – GIS.

https://boisehome.cityofboise.org/departme nts/it/department-information/divisions/gismapping/ Use <u>Avenza</u> for <u>off-line mapping and to access digital</u> (<u>static</u>) <u>maps</u> such as radio coverage, city map books, or complex maps. Maps must be manually loaded and updated from BFD's FTP site to each device. Unlimited maps can be downloaded on all Intterra iPads and BC cell phones. Free accounts are available to all, allowing up to three maps.
